

IMAGES USED IN NATIONAL PROMOTION

We carried out an aerial survey of the 18th Century Marple Aqueduct for Arcadis recently to help them understand the condition of the brickwork underneath the arches. The images were picked up by the UK Canal and River Trust and are now being used to promote a refurbishment project and parapet installation.

[The Canal & River Trust](#) is a charity charged with protecting 2,000 miles of waterways in England and Wales along with a huge network of bridges, embankments, towpaths, aqueducts, docks and reservoirs.

Aside from being an important part of our historical heritage, aqueducts are fantastic engineering feats that deserve our care and attention. Close inspection with a drone avoids the safety issues associated with ropes and scaffolding, and helps ensure a 'hands-off' approach that can help avoid damage.

For more information on aerial inspections or to find out about using drones in challenging locations, please [get in touch](#).

Ends.

Notes for Editors

Sky Revolutions Ltd.

Sky Revolutions is one of the UK's most authoritative voices in aerial imaging, surveying, and aerial surveying. The company offers exceptional quality multi-sector time lapse, aerial imaging, and surveying services to private and public sector institutions, Europe-wide.

Sky Revolutions is a dedicated team of professionals with more than 20 years' experience in construction surveying. Valued for their specialist surveying skills, Sky Revolutions offers effective advice and data interpretation as well as filming, mapping and CAD services.

Sky Revolutions is known for leading the way with aerial imaging and remains the only organisation using 100' masts to provide a free standing, at-height image solution for large construction sites. Highly qualified and accredited, its UAS (Unmanned Aircraft Systems) expertise helps customers access complex and often hazardous environments, see and record the condition of assets from a birds' eye view, and make informed assessments quickly, safely and cost-effectively. The company uses some of the most sophisticated drones in the market to capture ultra-high definition images at a fraction of the cost of traditional aircraft surveys and with fewer risks than platform or scaffold use.

Sky Revolutions was one of the first UK organisations to realise the benefits of drones in surveying. Drones or UAVs (Unmanned Aerial Vehicles) offer significant advantages in surveying and high-level inspection.
