

## Cygnum

We recently visited Cygnum in Ireland to plan, shoot, and edit a video to help them to communicate the many benefits of timber-frame homes. Timber frames are one of the oldest known methods of building in the developed world and their popularity in the UK has grown significantly thanks for their energy efficiency. Cygnum was looking for a way to showcase its factory-controlled building methods, its focus on sustainability, and the reduced on-site labour requirements of their approach.

Cygnum invited Sky Revolutions' qualified and highly experienced drone pilots to their premises for a two-day shoot covering every stage in the process of creating a new home. The shoot involved both indoor and outdoor locations, so Sky Revolutions selected drone and camera technology that was well suited to each environment. Our post-production specialists then edited the footage and added motion graphics to highlight the key messages.

In residential construction, it's important that contractors, stakeholders, and owners have access to the data they need to stay up to date with the progress of the development. We provide our customers with the assets they need for logistics and pre-planning, for monitoring site safety, and – increasingly - for marketing their services.

To learn more about Sky Revolutions, check out our website. Alternatively, to discuss your marketing video plans, get in touch via the contact form or call us on **+44 (0)1778 560929**.

## Notes for Editors

### **Sky Revolutions Ltd.**

Sky Revolutions is one of the UK's most authoritative voices in aerial imaging, surveying, and aerial surveying. The company offers exceptional quality multi-sector time lapse, aerial imaging, and surveying services to private and public sector institutions, Europe-wide.

Sky Revolutions is a dedicated team of professionals with more than 20 years' experience in construction surveying. Valued for their specialist surveying skills, Sky Revolutions offers effective advice and data interpretation as well as filming, mapping and CAD services.

Sky Revolutions is known for leading the way with aerial imaging and remains the only organisation using 100' masts to provide a free standing, at-height image solution for large construction sites. Highly qualified and accredited, its UAS (Unmanned Aircraft Systems) expertise helps customers access complex and often hazardous environments, see and record the condition of assets from a birds' eye view, and make informed assessments quickly, safely and cost-effectively. The company uses some of the most sophisticated drones in the market to capture ultra-high definition images at a fraction of the cost of traditional aircraft surveys and with fewer risks than platform or scaffold use.

Sky Revolutions was one of the first UK organisations to realise the benefits of drones in surveying. Drones or UAVs (Unmanned Aerial Vehicles) offer significant advantages in surveying and high-level inspection.
